

# COUNTERAGENT

## Bleach/Sodium Hypochlorite Neutralizer

**Counteragent** is utilized as a secondary roof rinse to neutralize corrosive bleach crystals before reaching drip lines.

Bleach Streak on glass results from poor rinsing of bleach solutions when they contact hot panes. **Counteragent** removes bleach streak.

A regular spray down with **Counteragent** at days end will neutralize bleach crystals on equipment, trailers and vehicles, helping to protect from rapid corrosion.

Pumps, sprayers, hoses and fittings can be flushed, thus stopping premature repairs and replacement.

**Directions for use:** Pre-rinse all surfaces to be treated. Mix 8 - 16 oz. with 5 gallons of water for low pressure spray applications on windows or to spray down equipment. Mix 8 - 16 oz. per 5gallon for X-Jet application. Mix 15 - 24oz per 5 gallon for downstream injectors. Rinse lightly.

### TECHNICAL INFORMATION

**Color:** Blue

**Appearance:** Clear Liquid

**pH:** 9 - 10

**This product is not regulated**

Keep out of the reach of children. Do not handle until all safety precautions have been read and understood. Use eye, face, and rubber glove protection when handling these contents. Do not store at temperatures above 120°F. Do not allow to freeze.
